

# A Perfect Fit

## Hudco Compactor Drivers and your backhoe or excavator

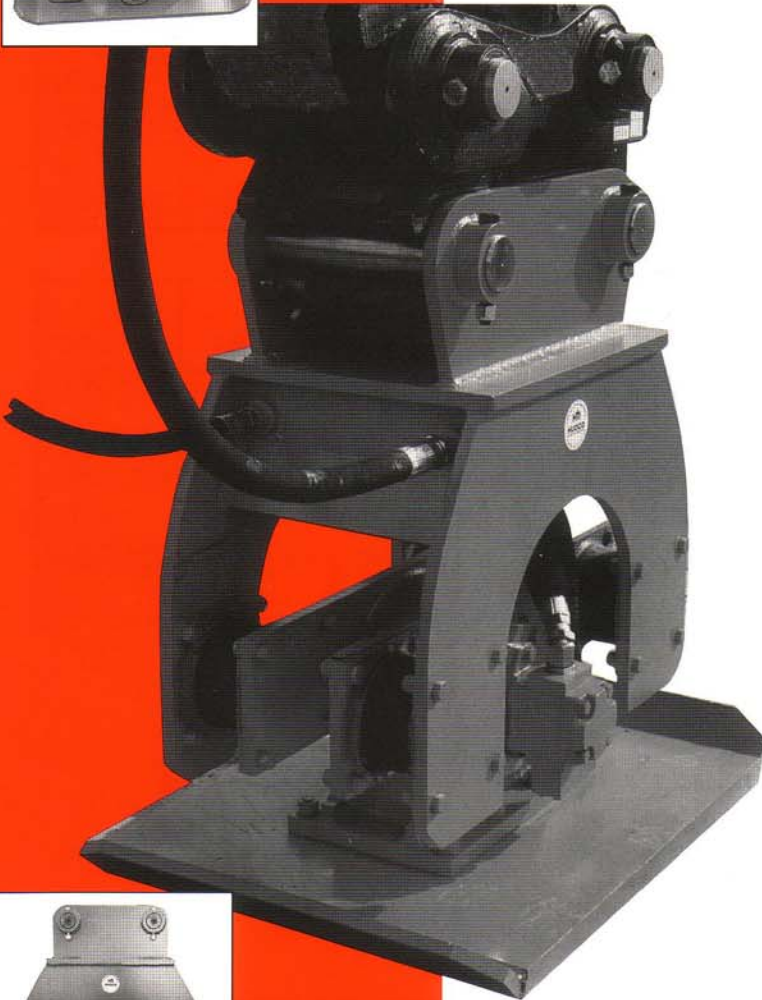

We have  
mountings to  
fit them all!

- Compacts soil in trenches, foundations and on slopes.
- Drives wood, steel sheeting, posts and beams.
- Keeps the crew out of the trench while compacting.
- More productive than hand-held units.
- Custom fit to your excavator.

- Hudco's HC-10, HC-12, and HC-15 are perfect for tight trench work with narrow baseplates.
- The HC-10, HC-12, HC-15, and HC-20 include a bypass check valve to protect the hydraulic motor.

## Which Compactor top will fit your machine or quick attach system?

Custom compactor tops are a necessity when using **quick attaching** bucket mechanisms, and custom fitting eliminates the need for additional loose pins and bushings. If you need a flat top, a bolt-on top, a swivel top, or welded ears to fit your machine or custom specifications, let us know when placing an order.

## What kind of options are available?

Hudco offers extended base plates, swivel tops, hydraulic valves and complete hydraulic installation kits designed by our engineers to fit your machine. Our kits allow for rapid switching of compactor, bucket, hammer, or other attachment. Hudco valves allow for simultaneous operation of the compactor and machine.
